GSA BULLETIN FPMR A-2
GENERAL AUG 9 '77
SUPPLEMENT 68

TO : Heads of Federal agencies

RECEIVED SECTION
CURRENT SERIAL RECORDS

SUBJECT: Commuted rate schedule for transportation of household goods

1. Purpose. This supplement transmits revised pages for the commuted rate schedule contained in attachment A to GSA Bulletin FPMR A-2.
2. Effective date. The provisions of this supplement shall apply on transportation begun on and after June 12, 1977.
3. Expiration date. This supplement contains material of a continuing nature and will remain in effect until canceled.
4. General. Van carriers of household goods have published a general increase of 4 percent in their line-haul transportation rates, effective June 12, 1977. Corresponding changes are made in the commuted rate schedule as reflected in the revised pages transmitted by this supplement.
5. Summary of changes in attachment A. The allowances in tables 1, 2, 3, 4, and 5 on pages 3, 4, 7 thru 10, and 13 thru 15 of the commuted rate schedule are revised to reflect the carriers' increases.
6. Filing instructions. Remove pages 3, 7 thru 10, and 13 thru 16 from attachment A and insert new pages 3, 7 thru 10, and 13 thru 16. In line 9 on page 17, change the reference to "page 16" to read "page 20." The current commuted rate schedule consists of pages from attachments to supplements 67 and 68. It is recommended that removed pages be retained for determining which commuted rates were in effect at particular times.

At the direction of the Administrator of General Services.

Note: The tariffs approved by the Interstate Commerce Commission include minimum weight provisions to ensure that, in instances where the charges computed in one weight bracket exceed those computed for the same mileage in the next higher bracket, the lower rate is used. The breakpoint columns are designed as a convenience in determining the proper amount of reimbursement in such instances, as explained in the following footnotes:

TABLE 1 (continued)

- 1/ The rate per 100 pounds applicable for the transportation of 999 pounds or less, for the applicable mileage, column (a), is that shown in column (b) unless the weight equals or exceeds the number of pounds shown in column (c) for the applicable mileage; in the latter case, the applicable rate is that shown in column (d) for the same mileage, and the applicable weight is the minimum hundredweight of that column, instead of the actual weight of the goods transported. For example, if a shipment weighing 728 pounds is moved for a distance of 100 miles, the applicable rate is \$23.55 per 100 pounds, and the total applicable allowance is \$171.44. If a shipment weighing 729 pounds is moved the same distance, the applicable rate is \$17.15 per 100 pounds, and the total applicable allowance is \$171.50 based on a minimum weight of 1,000 pounds.
- 2/ In the case of transportation of shipments weighing 1,000 to 1,999 pounds; 2,000 to 3,999 pounds; or 4,000 to 7,999 pounds, the amount of reimbursement is computed by using columns (d), (e), and (f); (f), (g), and (h); or (h), (i), and (j) in the same manner as described for columns (b), (c), and (d).
- 3/ In the case of transportation of shipments weighing 8,000 to 11,000 pounds, the amount of reimbursement is the product of the applicable rate in column (j) for the applicable mileage, multiplied by the number of hundredweight transported. For example, if a shipment weighing 9,500 pounds is moved a distance of 200 miles, the applicable rate is \$12.10 per 100 pounds, and the total applicable allowance is \$1,149.50.
